

**CSCI 3000 DA (Web Programming)**  
Fall 2018  
Homework 1

---

1. Create a simple HTML-based personal web site. This site should have

- information about you or anything that interest you.
- at least 25 HTML elements (including some attributes and properties) other than `<html>`, `<head>`, `<body>` and `<title>`. Each element is worth 2 points.
- HTML elements presented in class.

Note: If you include images or pictures, submit also those images or pictures as separate files.
