

CSCI 3000 DA (Web Programming)
Fall 2018
FINAL PROJECT

1. This is a team project. You should work with your teammates to create a responsive website using your own styling and content. The website will be an online store for selling beverages. You must consider at least the following requirements:
 - A home page describing the business and the products you are selling (25 points)
 - A shopping cart (25 points)
 - Customer Sign-in (25 points)
 - Payment and inventory processing (30 points)
 - A database containing one table with at least 10 products (25 points)
 - A second table of customers. You can add more tables if necessary for performing all the activities requested (25 points)
 - Entry and report of the inventory (25 points)

The presentation of the project, including a demonstration of how the website operates, is worth 20 points.
