

# CSCI 3000 DA (Web Programming)

Fall 2018

Homework 4

1. Create a main web page with the layout provided in the figure 1, but with your own information.

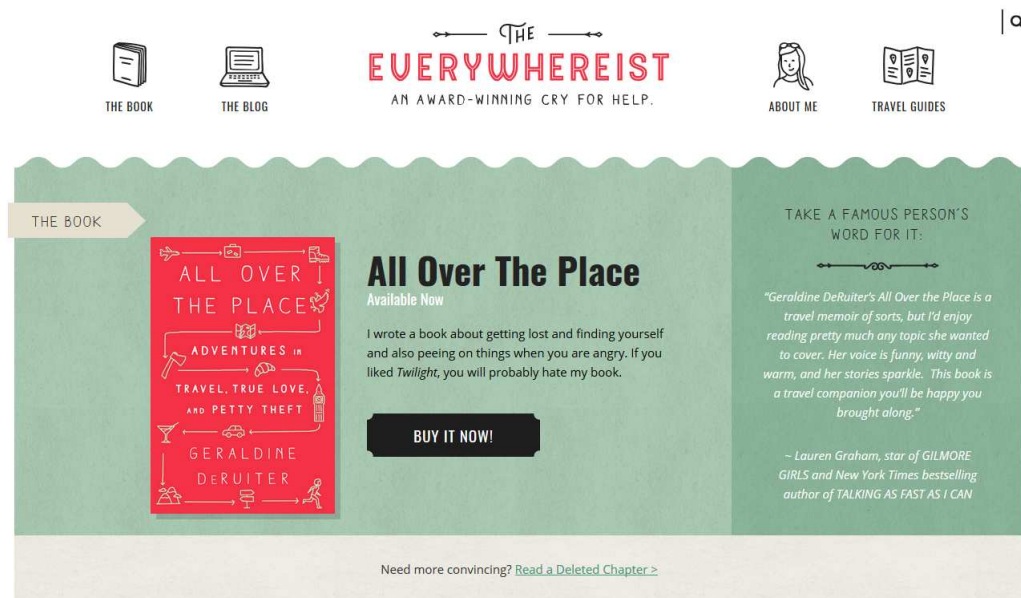

Figure 1: A personal main web page

Also, create the page for the link “Travel Guides”, see the figure 2, again with your own information.

Create the HTML and CSS files in order to reproduce this main website and the page for the link “Travel Guides” as close as possible. The content will be your own information and picture. All styling should be done in the external CSS file. Consider the following aspects of the web site (2 HTML files and corresponding CSS files):

- General Layout: relative position of all elements. (10 points for each page)

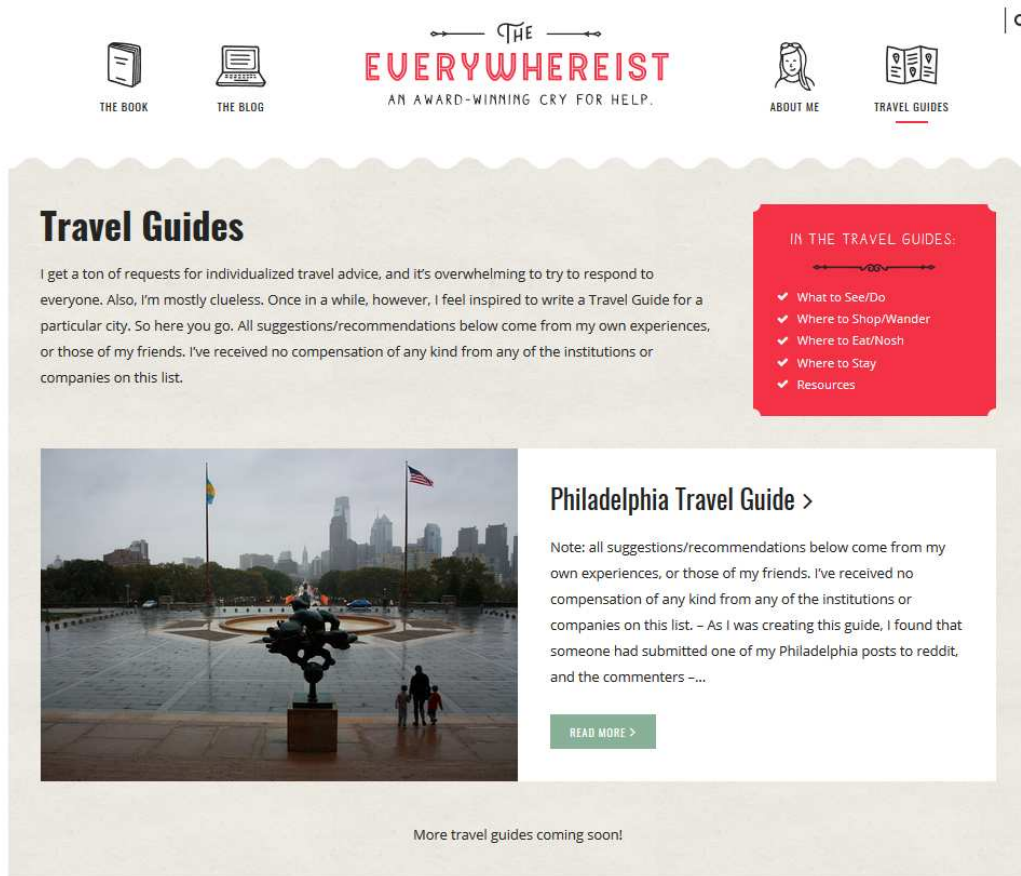

Figure 2: Travel Guides page

- Header area (1 point for each page)
- Main Logo (Name and subtitle) (2 points for each page)
- Navigation Bar (2 points for each page)
- Main content: picture (left area) (2 points for each page)
- Main content: main description (central area) (4 points each page)
- Main content: contact information (right area) (4 points each page)
