CSCI 3000 DA (Web Programming)
Fall 2018
MIDTERM PROJECT

---

1. This is a team project. You should work with your teammates to create a responsive website using an open source CSS framework. You can chose one from the following list or suggest a different one that you prefer.

   - Bootstrap
   - 3w.css
   - Foundation
   - Gumby
   - UIKit
   - Semantic UI
   - Material Design Lite Framework (MDL)
   - Materialize
   - Skeleton
   - Milligram
   - Pure.CSS
   - Bulma
   - Spectre.css
   - mini.css
   - Material
   - Kube

   The web site will be for the UNG Computer Science Club. It should have information about the club, members and activities. You should consider a proper Layout (50 points), Menu/-Navigation Bar (20 points), Header and Logo(20 points), Footer and contact information (20 points), and Content (at least: club description, list of members and officers, past/current activities and projects) (40 points).
