CSCI 3000 DA (Web Programming)
Fall 2018
Homework 3

---

1. Create a main web page with the layout provided in the figure 1, but with your own information.

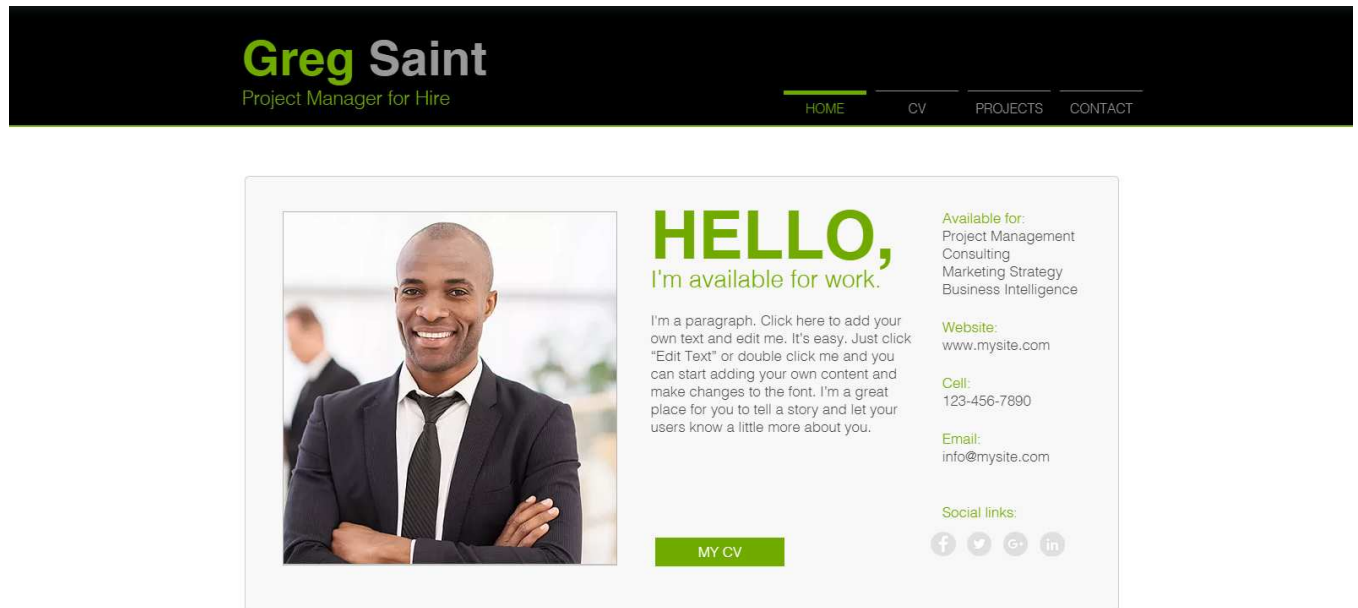

Figure 1: A personal main web page

Create the HTML and CSS files in order to reproduce this main website as close as possible. The content will be your own information and picture. All styling should be done in the external CSS file. Consider the following aspects of the web page:

- General Layout: relative position of all elements. (20 points)
- Header area (2 points)
- Main Logo (Name and subtitle) (6 points)
- Navigation Bar (8 points)
- Main content: picture (left area) (4 points)
- Main content: main description (central area) (5 points)
- Main content: contact information (right area) (5 points)
